Fractions on Bar Graphs

Name ——————————————————— Date ———————————————

A school surveyed students to see what sporting activities they like best. The graph shows the fraction of all students and the activity they like best. Solve the problems using the graph.
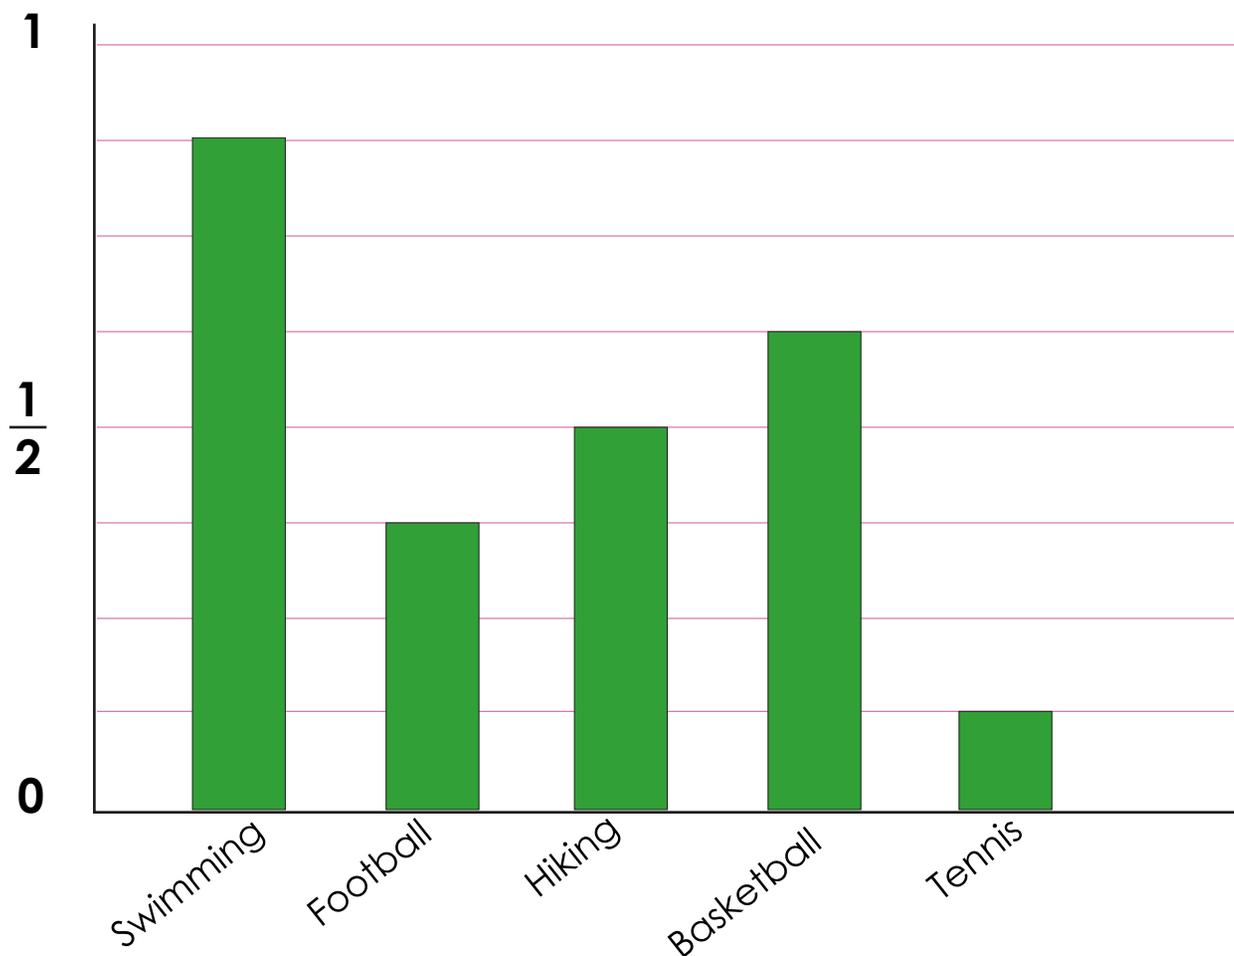

1. Which sporting activities are practiced by more than half of the students **?**

2. What fraction of students like the least popular activity **?**

3. What fraction of students like the most popular activity **?**

4. What fraction of students like basketball **?**

5. What fraction of students like swimming **?**
