Sandra’s class voted on their favorite sporting activity. Using the circle graph, answer the following questions.

1. Which event received the lowest number of votes?
2. Which event received the highest number of votes?
3. Which event did 10% of the students vote for as their favorite?
4. What is the total percentage of students who voted for basketball and golf?
5. What is the total percentage of students who voted for skiing?
6. If 200 students were involved, how many of them voted for basketball?
